THE LITIGANT PORTAL

The Elevator Pitch:

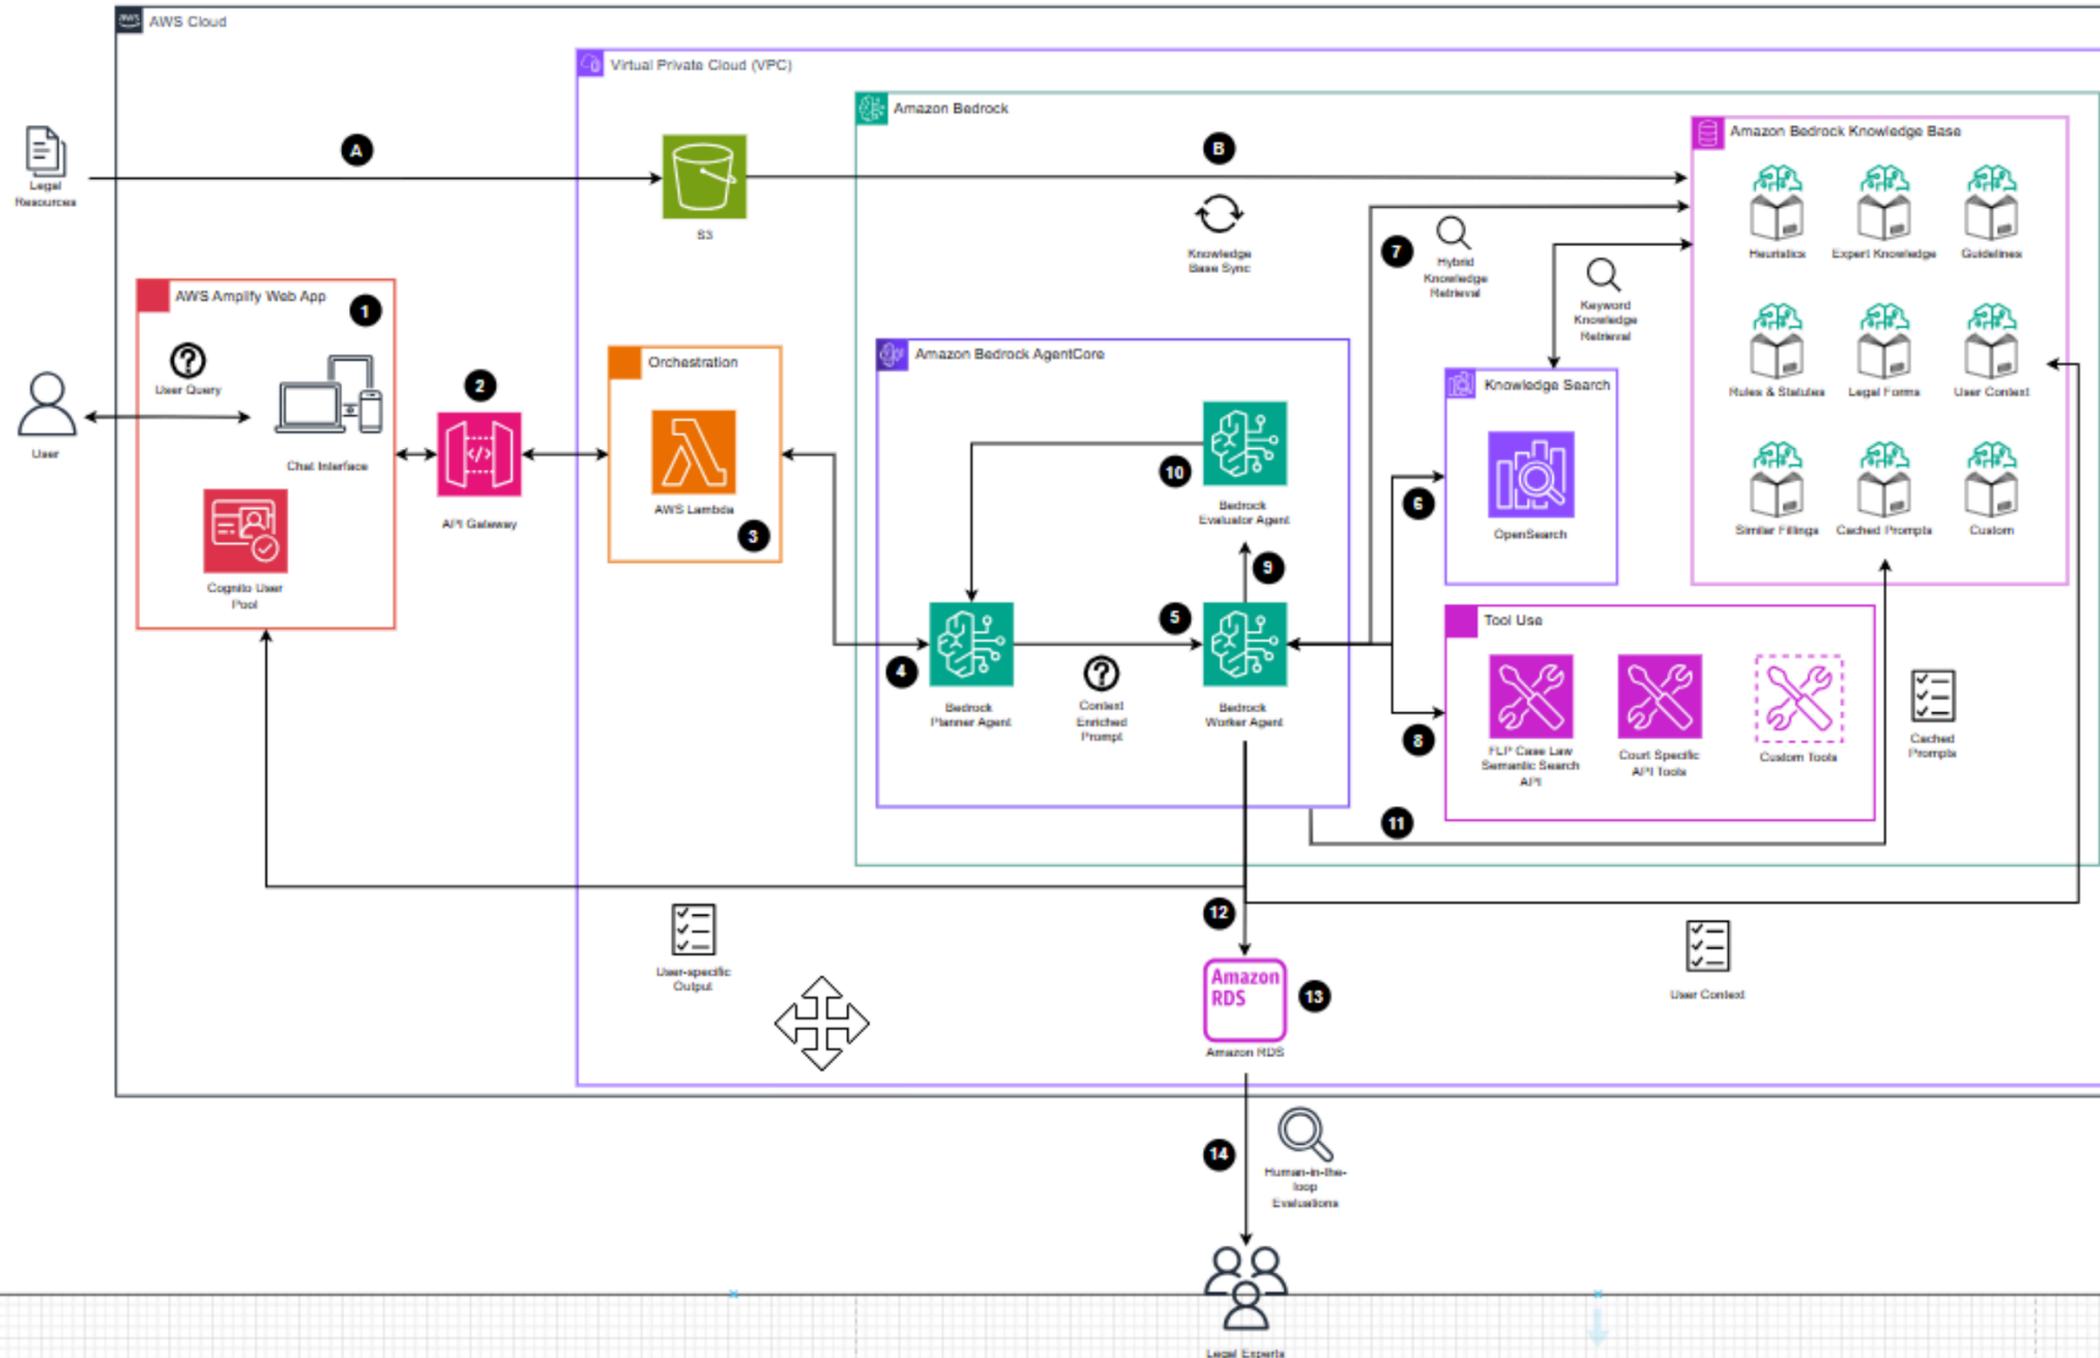

Every year, millions of Americans navigate the justice system without a lawyer, facing confusing processes and limited support. To address this, Free Law Project is building an AI-powered Litigant Portal designed to help self-represented people access justice. The portal will offer personalized legal guidance, AI-assisted form completion, and eFiling—tailored to jurisdictional rules. Powered by our legal data infrastructure and RAG integrated agentic workflow, it will deliver accurate, context-aware support at scale. We will pilot the portal in real courts—improving outcomes for litigants, reducing burdens on court staff, and helping make the justice system more accessible to all.
